SWISS COMPLIANCE

DYNAMIC 4% DAILY ROI FORMULA

Capital converts into a 2X Contract Allocation Pool, releasing 2.00% daily decaying returns until 200% is claimed.

THE MATHEMATICAL 2X POOL & DECAYING FORMULA

1. Capital Stake creates an instant 2X Contract Pool (\$100 Stake → \$200 Pool)

2. Daily Payout = 2.00% × Remaining 2X Pool Balance

★ Day 1 Return: $\$200 \times 2.00\% = \4.00 (Exact 4.00% Daily on your Stake!)

Remaining Balance = $\text{Balance}(t-1) - \text{Daily Payout}$

Unlike legacy systems that promise flat rates until sudden bankruptcy, **Crypto Finance** allocates a 2X contract pool and pays 2% on the decaying balance pool.

This delivers an initial **4.00% Daily Return on Capital** and mathematically ensures hundreds of days of stability while systematically paying out exactly **200% (2X)** of your stake!

\$100 STAKE LIVE WALKTHROUGH

Dual Return Math: 4.00% Daily on Main Capital equals 2.00% Daily on the 2X Contract Pool.

DUAL PERSPECTIVE ROI MATH

1. MAIN CAPITAL PERSPECTIVE

4.00% Daily Yield

On your \$100.00 Main Capital, your daily payout starts at \$4.00 USDT / day (representing an exact 4% daily ROI).

2. 2X CONTRACT POOL PERSPECTIVE

2.00% Daily Release

Your \$100 stake unlocks a \$200.00 (2X) Pool. The smart contract releases 2.00% daily: $\$200.00 \times 2\% = \4.00 USDT.

★ Mathematically Equivalent: 4% of Principal = 2% of 2X Contract Allocation Pool

STEP-BY-STEP DAILY CASHOUT

Day 1: $\$200.00 \times 2\%$ = \$4.00 (After Cashout: \$196.00)

Day 2: $\$196.00 \times 2\%$ = \$3.92 (After Cashout: \$192.08)

Day 3: $\$192.08 \times 2\%$ = \$3.84 (After Cashout: \$188.24)

Day 4: $\$188.24 \times 2\%$ = \$3.76 (After Cashout: \$184.47)

→ Continues daily until full \$200.00 is extracted over 525 Days!

CAPITAL VS. DURATION (AUDITED)

◆ ◆ ◆ —————
Payouts run until remaining balance reaches half a cent (\$0.005).

STAKE	2X POOL	ACTIVE DURATION	TOTAL EXTRACTED	STATUS

Day 35: 2X DOUBLING!	\$3,999.78

2X CAP LOCK RULE & 4X PROFIT

Institutional safeguard preventing infinite compounding runaway, unlocking 400% extraction.

THE 2X CAP LOCK RULE

When compounding increases balance to near **2X of initial stake (\$3,999.78 on \$2,000)**, compounding enters an automated safety freeze.

MANDATORY REQUIREMENT

The investor **MUST** take at least 1 withdrawal before compounding can resume!

400% (4X) MAX EXTRACTION

By doubling your principal in 35 days and then switching to daily cashouts, withdrawals are paid from the doubled pool!
